Add WIFI Tuya APP Connected with Mobile Phone Setting

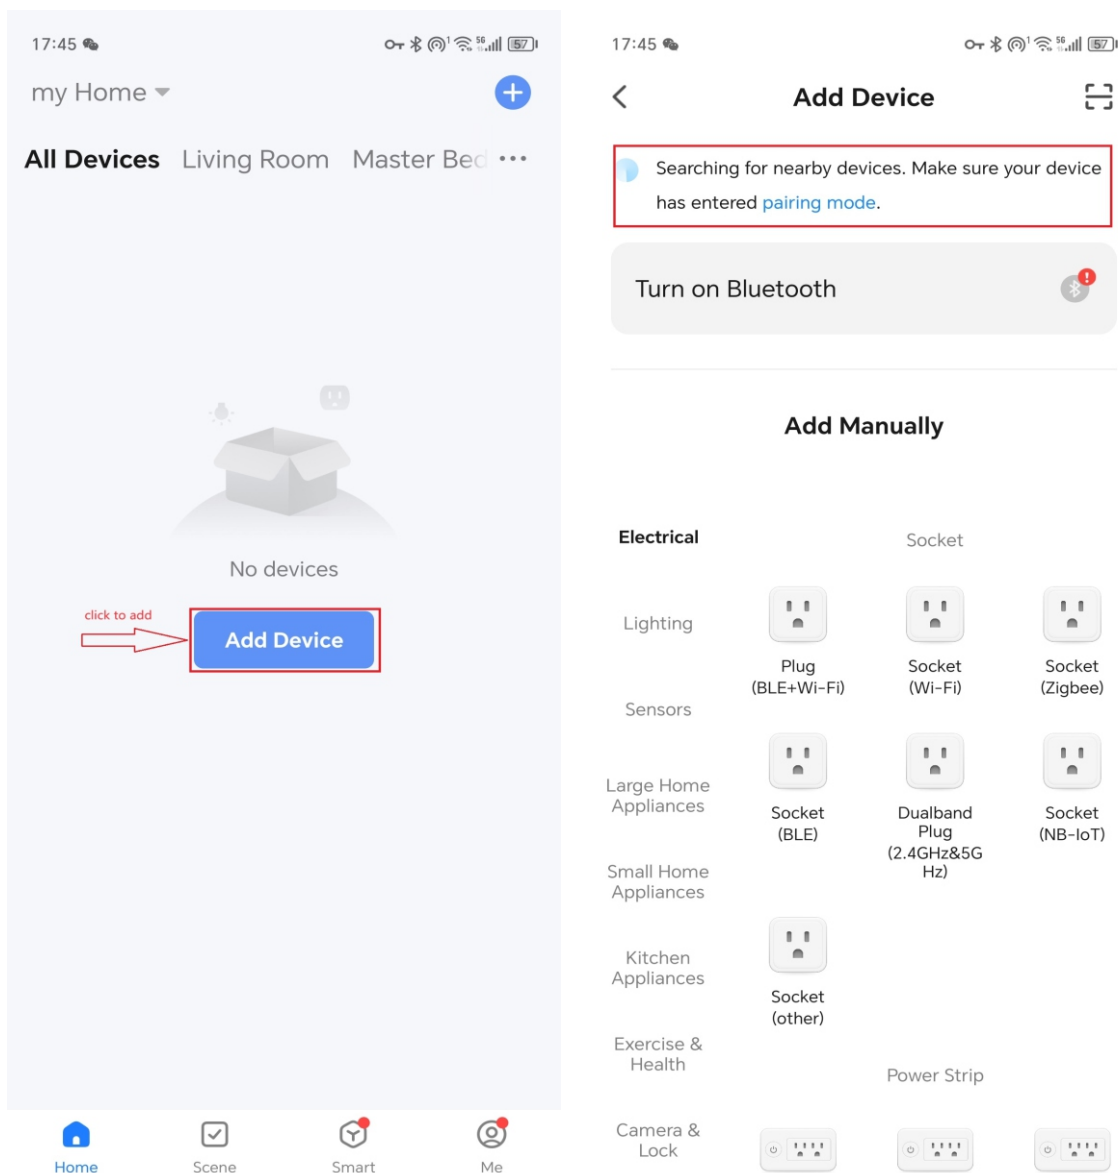

Steps 1

The mobile phone should be connected to the same Wi-Fi network as the monitor. Then, download either "Tuya Smart" or "Smart Life-Smart Living" from Google Play or the App Store, and register or log into your account.

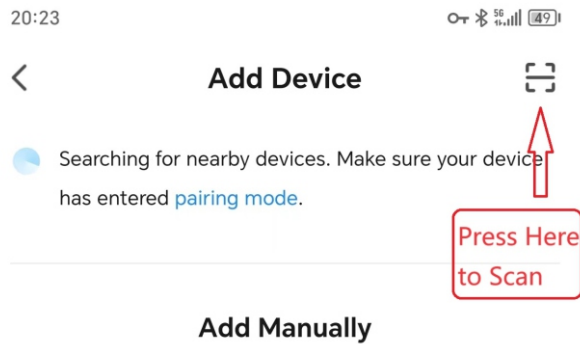

Steps 2

Open the app and click "Add Device." It will then search for and pair with the device.

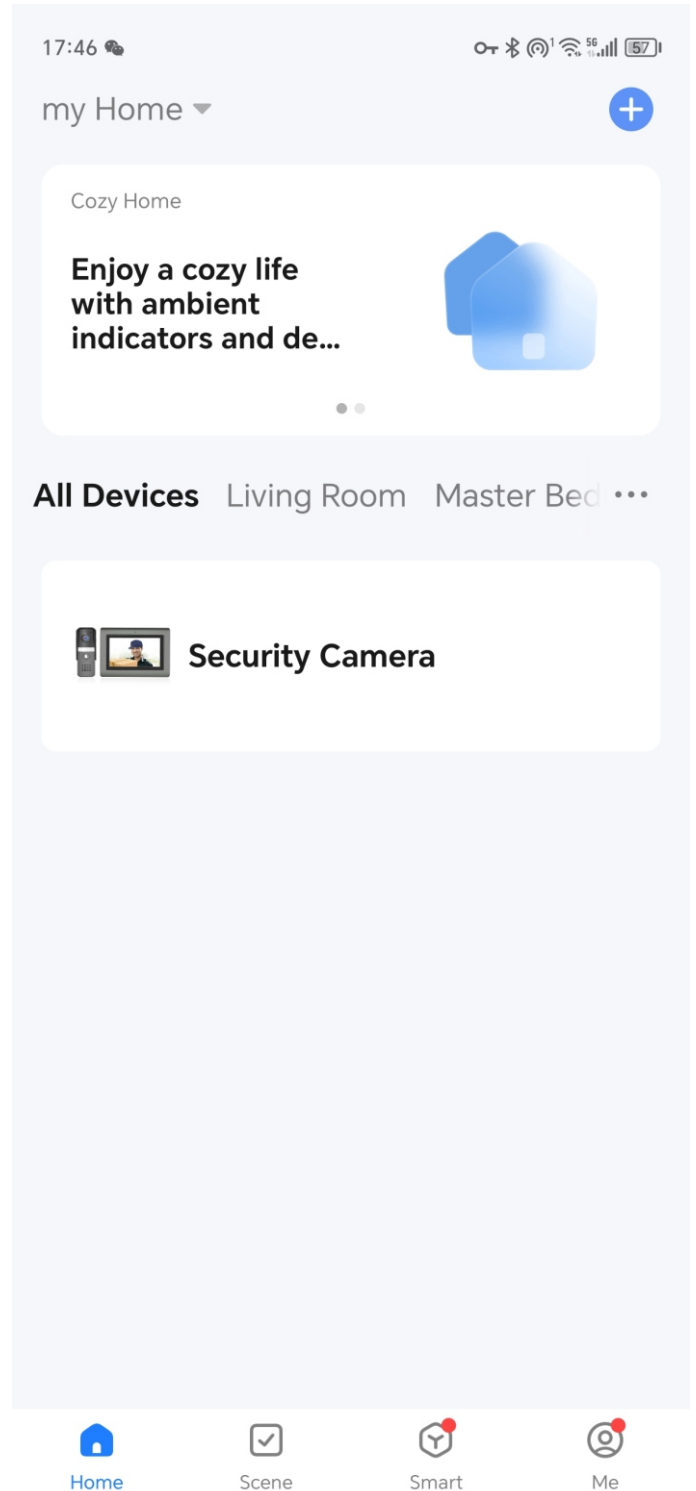

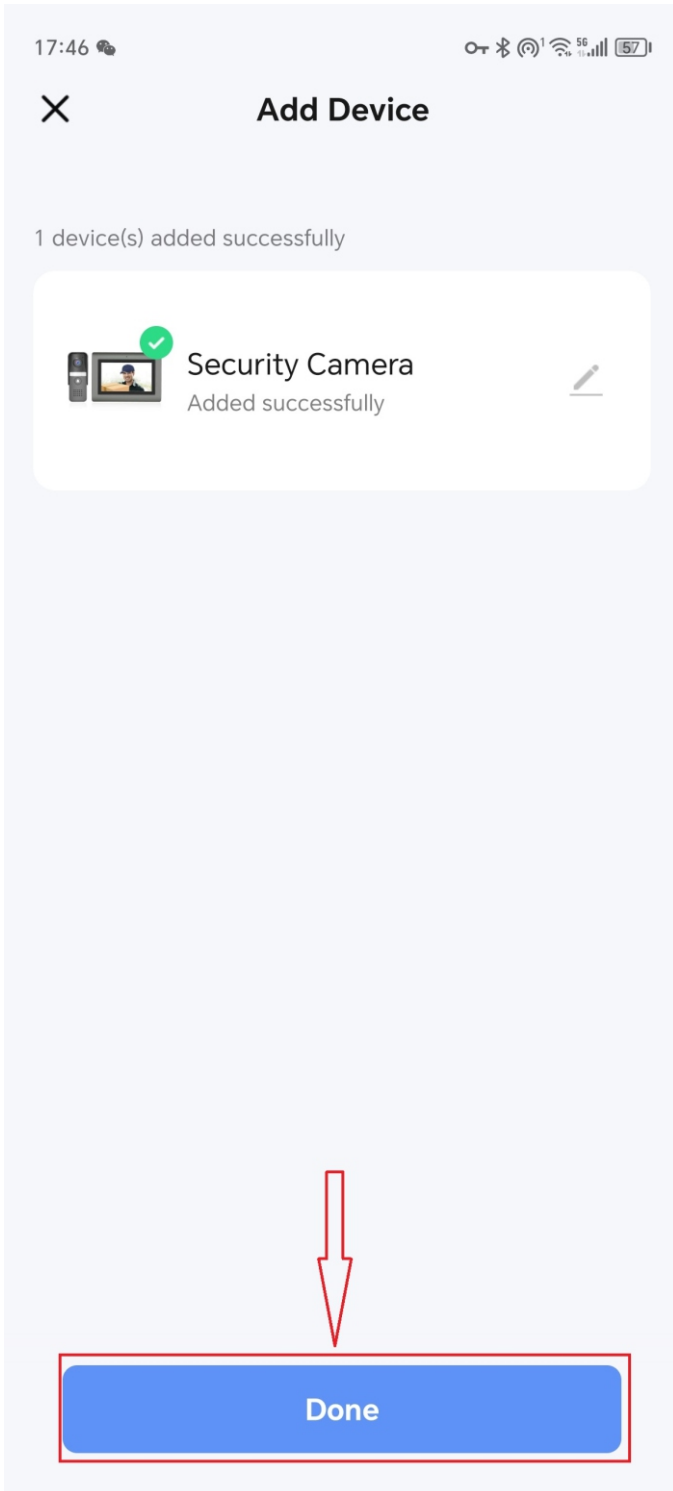

Steps 3

In Settings > WLAN, after connecting to Wi-Fi, a QR code will appear. Use the Tuya app to scan the QR code and wait for the device to be added.

Steps 4

Wait until the process is complete, then press "Done." The device will be added successfully.

How to Share to Other Users

Method 1

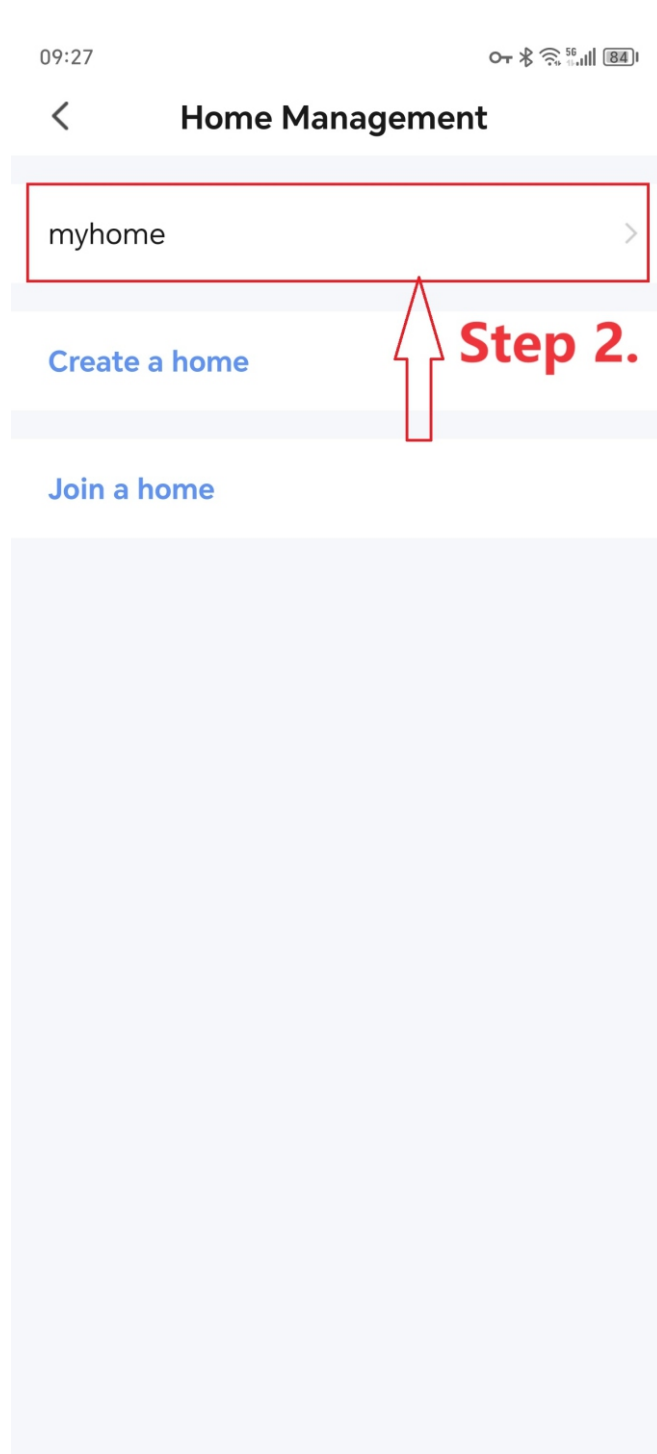

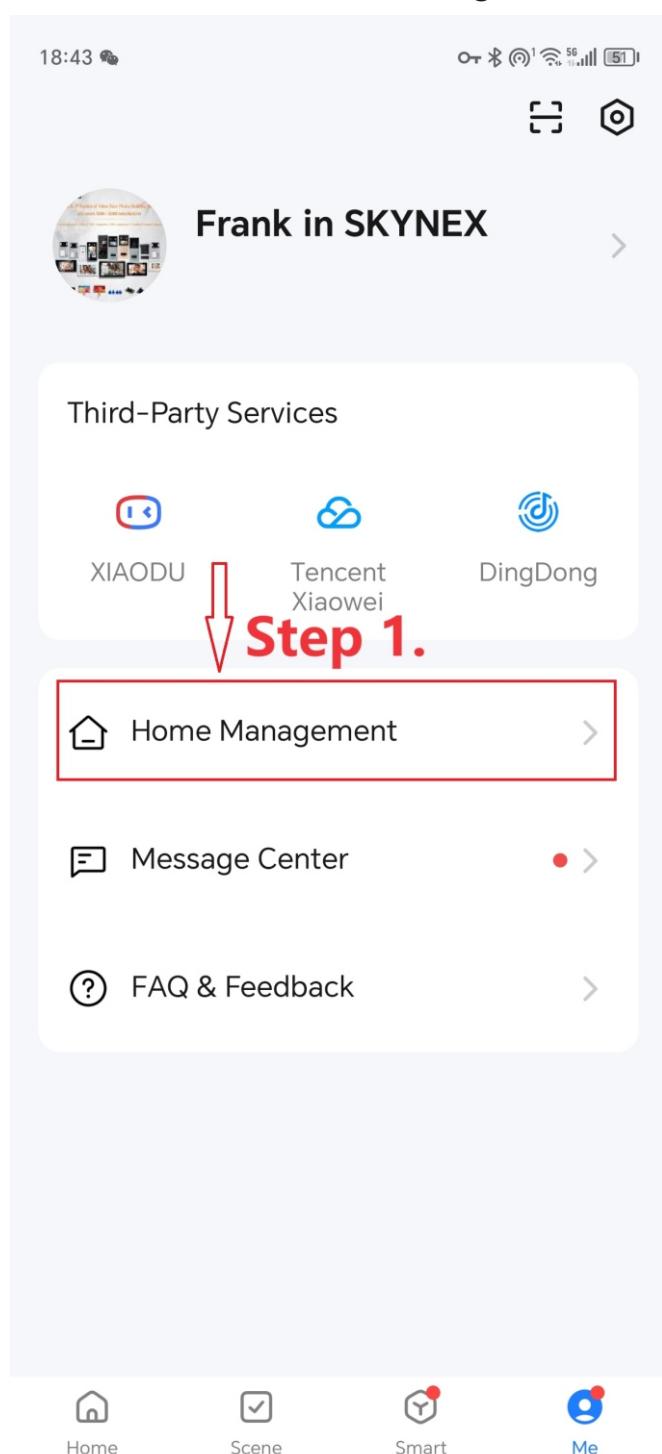

Log into your Tuya account on other family members' phones. A single account supports up to 200 mobile devices logged in simultaneously.

Method 2

Alternatively, add their accounts through your app (up to 20 members).

Step 1

Go to “Me” > “Home Management.”

Step 2

You need to “Complete Home Information” if you haven’t used Tuya or Smart Life before. Name the family group something like “My Home.” Then, in “Home Settings,” add family members.

Features

1. 7" color capacitive full-touch screen indoor monitor with Tuya/Smart Life app support.
2. 110° wide-angle view, night vision, IP65 waterproof call panel.
3. Video call, talk, intercom, room-to-room call, and unlock functions.
4. Unlock via indoor monitor, Tuya remote control, IC/ID/NFC cards, electric lock connection, and key access.
5. Supports IP camera connection via ONVIF protocol.
6. Monitoring with photo or video snapshots when visitors call.
7. Photo and video records, supports up to 128GB Micro SD memory card.
8. Supports cascading with up to 4 indoor monitors and 2 call panels, or adding a POE switch.
9. Resident name display on PVC board.
10. Supports unlocking of 2 doors.

7 Inch Full Touchscreen IP Indoor Monitor Interface Display

Function

1.Home Page

(1)Settings: Tap this icon to access the settings page.

(2)Monitoring: Tap to view the live feed from the outdoor station or IP cameras.

(3)Room Call: Press to call all other monitors within the same apartment

(4)Call Records: Shows photo or video records of incoming calls or manually taken captures.

(5)Mute: Enable or disable silent mode.

(6)Second Door: Unlock the second door linked to the monitor.

2.Monitoring Page

- (1)Device: Displays which call panel is calling or being monitored. While monitoring, click to switch to another call panel or IP camera.
- (2)Photo: Click to take a photo.
- (3)Video: Click to start recording a video, and click again to stop.
- (4)Volume: Click to adjust the volume. Drag left or right to decrease or increase the volume.

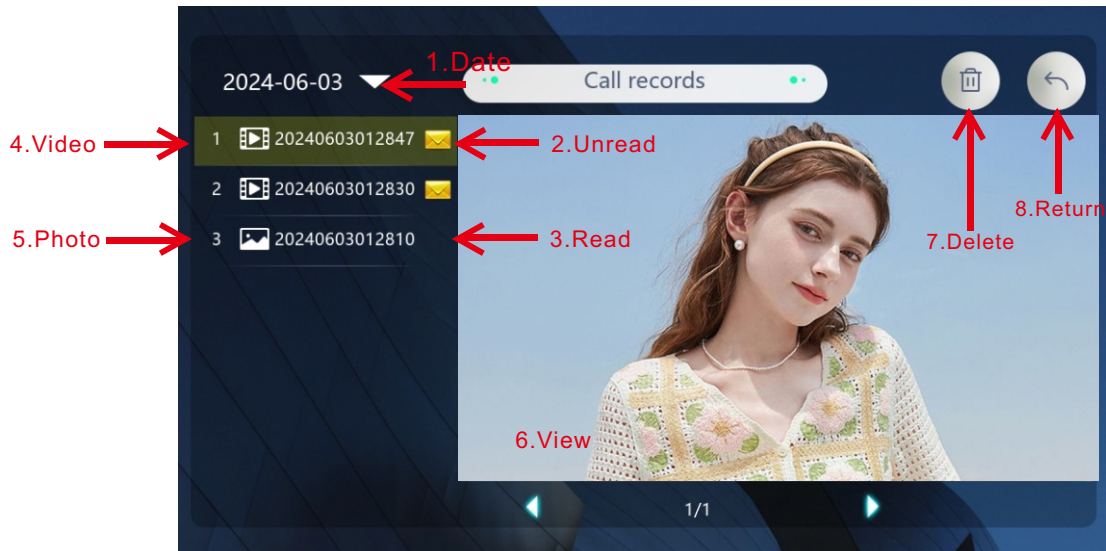

- (5)Contrast. Adjust brightness, contrast and color settings.

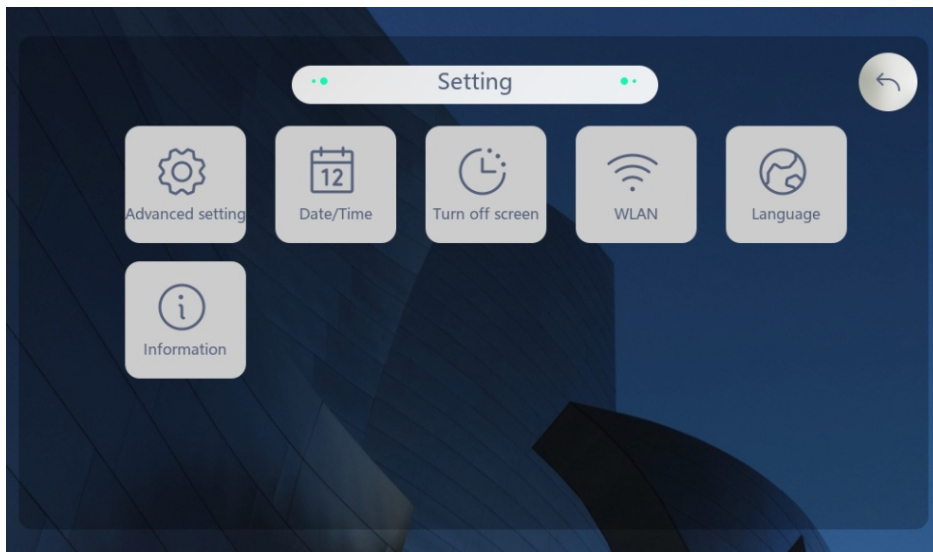

- (6)View Video. Click the picture to view the recorded video.

3.Call Records

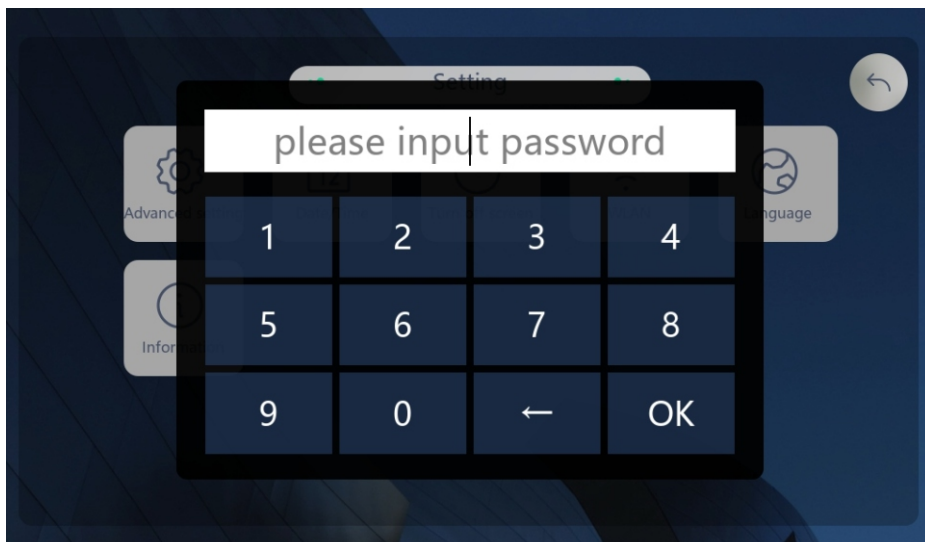

- (1)Date. (2)Unread. (3)Read.
(4)Video. (5)Photo.
(6)View Video. Click the picture to view video.
(7)Delete . (8)Return.

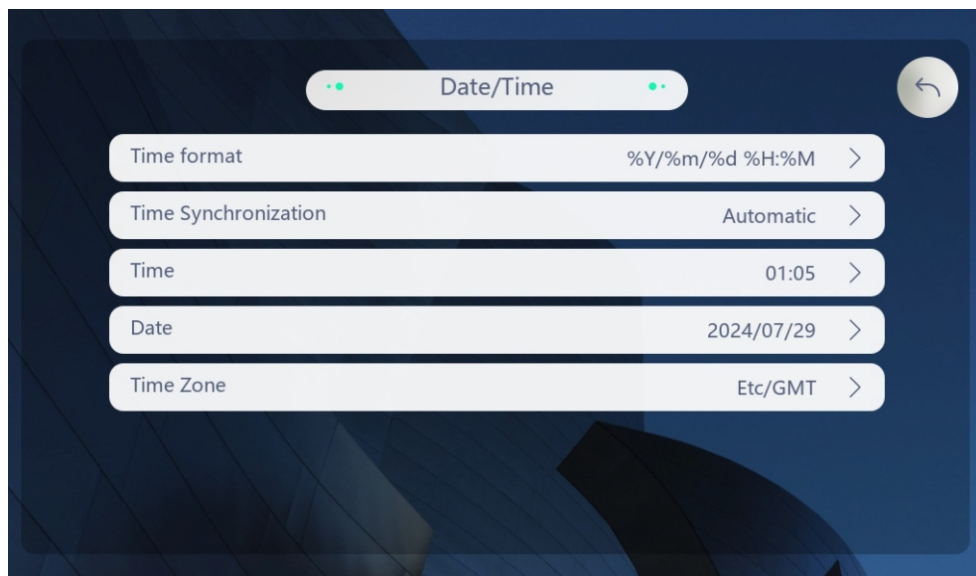

4.Setting

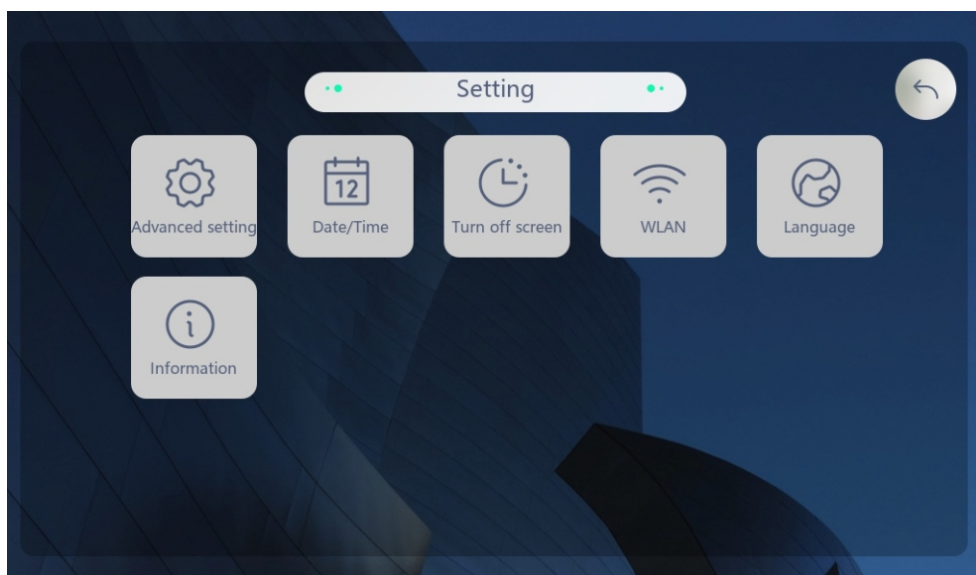

- (1) Advanced Setting (Default password: “666666”): Enter the password to access the advanced settings.

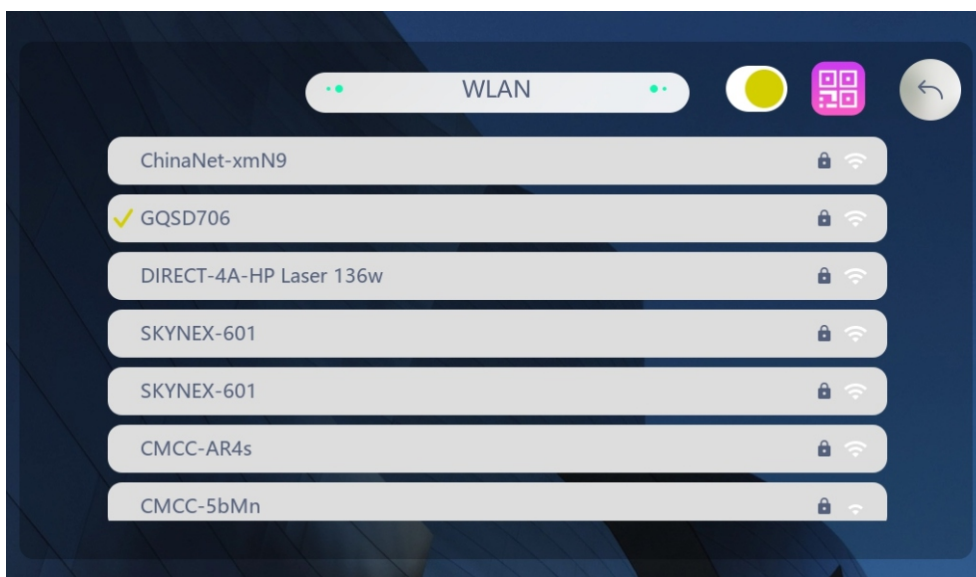

(2) Date/Time: Set the time format, automatically synchronize time, manually adjust the time and date, and configure the time zone.

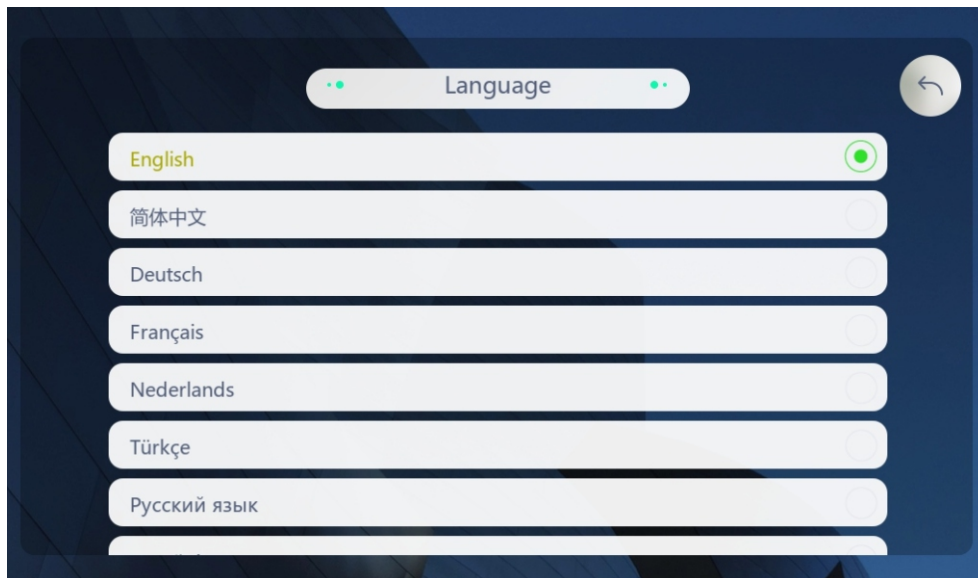

(3) Turn Off Screen: Set the duration before the screen turns off.

(4) WLAN: After connecting to Wi-Fi, a QR code will appear. Click on it and scan with the Tuya app.

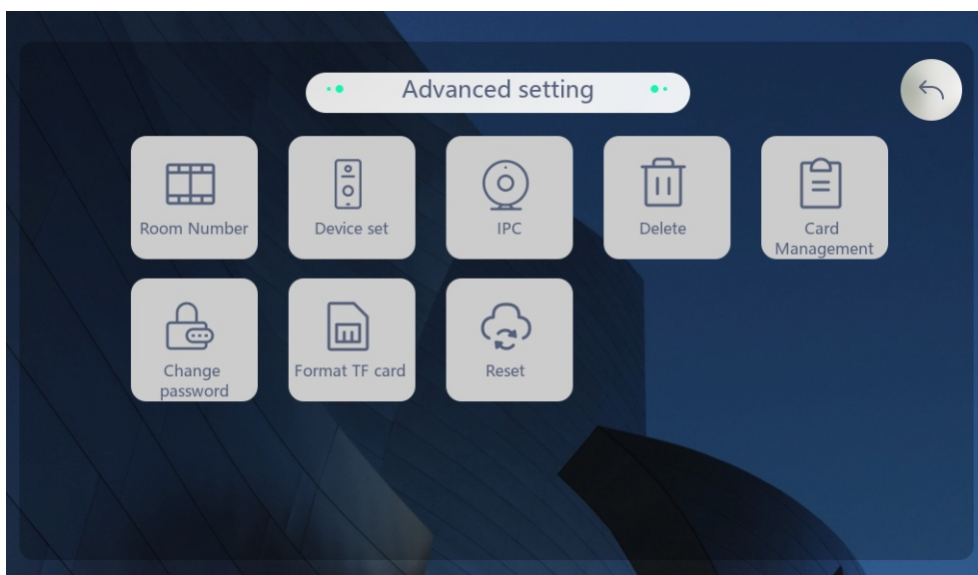

- (5)Language: Options include English, Chinese, German, French, Dutch, Turkish, Russian, Spanish, Portuguese, and custom.

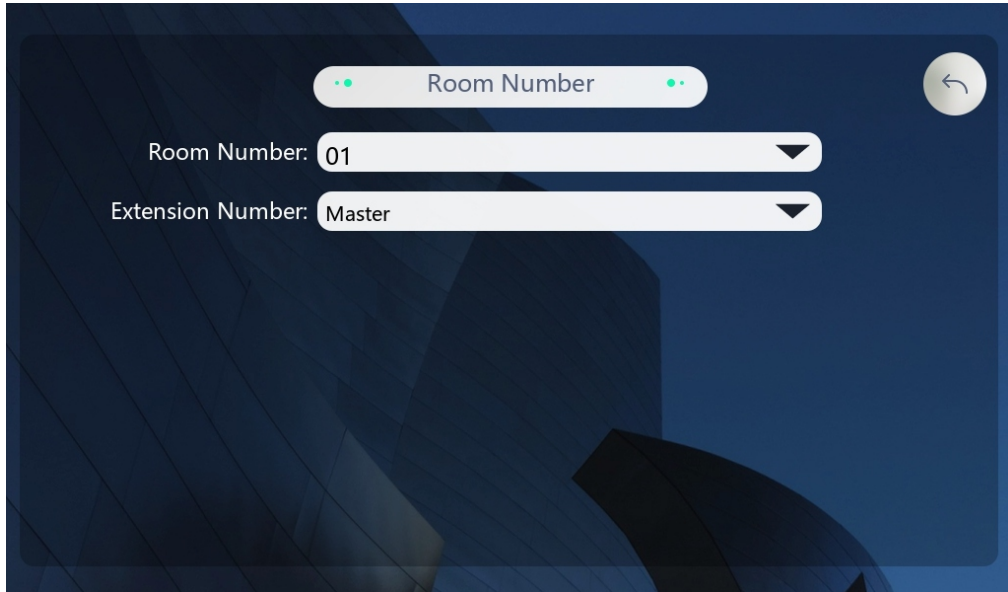

- (6) Information: Displays the room software version, IP address after connecting to Wi-Fi, MAC address, UUID, and TF card capacity.

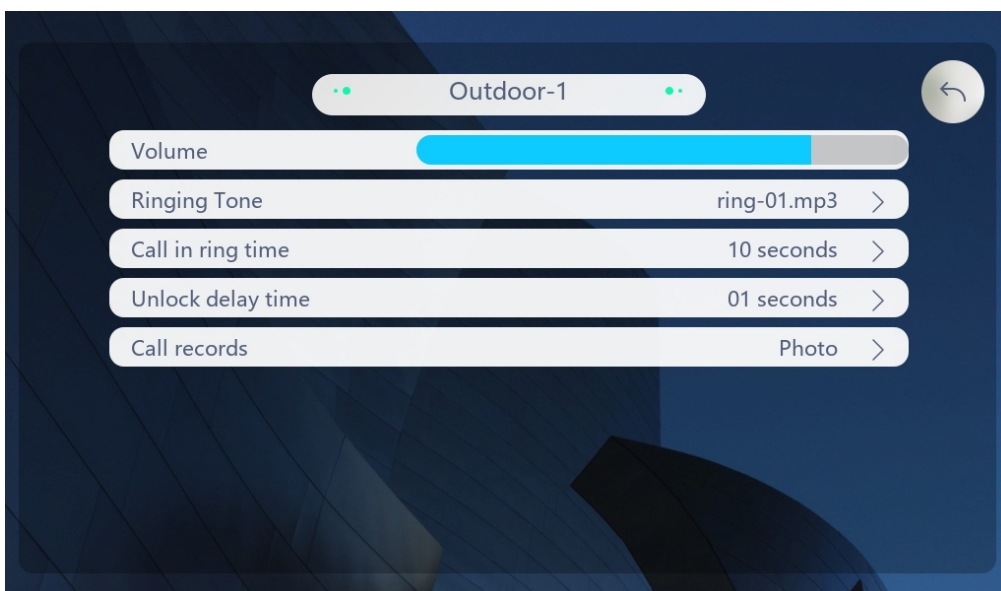

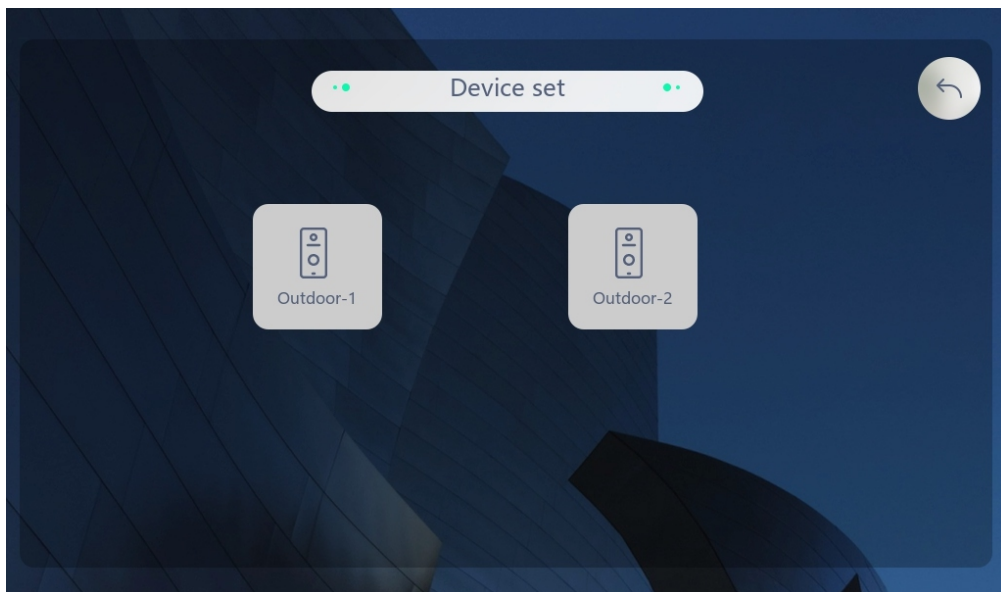

5.Advanced Setting

- (1) Room Number. Only the extension number set as Master can connect to Tuya. If there are multiple indoor units, they need to be set with different extension numbers, with a maximum of 4 indoor units. If used with P902, the room number must be set to 02 or 04.

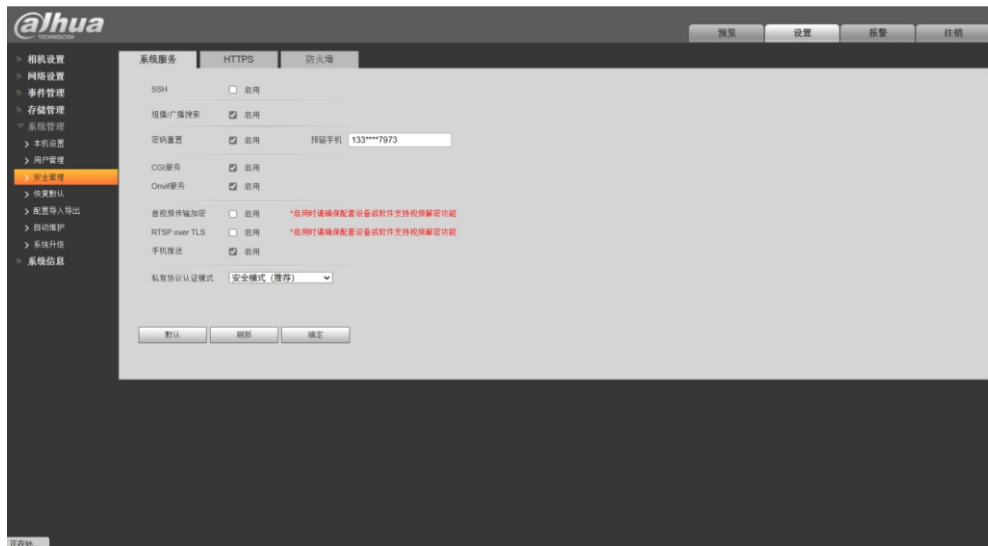

- (2) Device Set: Adjust volume, ringtone, ring duration, unlock delay, and select to record as photo or video.

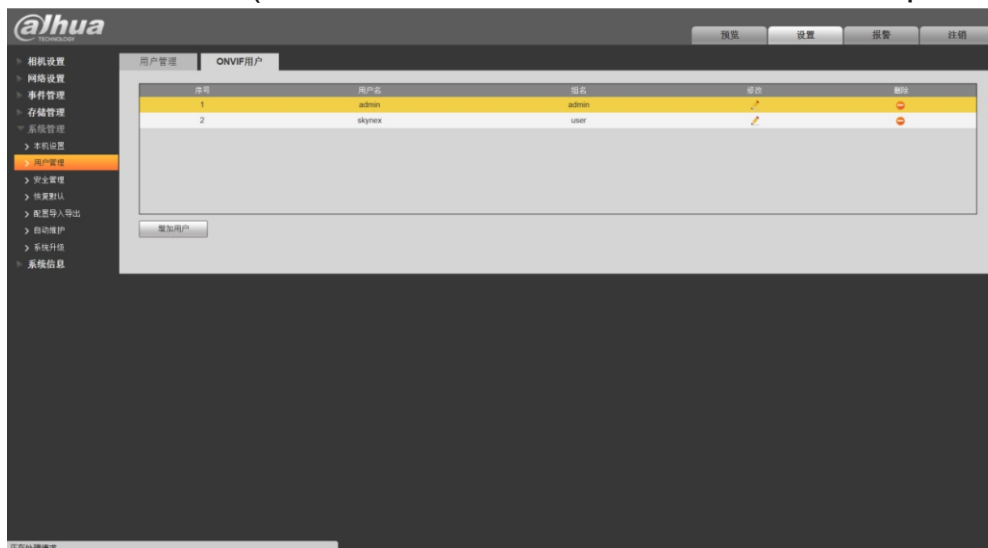

(3)IPC

A.In System Settings > Security Management > System Services, enable the ONVIF service.

B.In Settings > System Management > User Management > ONVIF User, click "Add User," enter the new username and password (to add a camera to the intercom device), select the user group for the new user, and click OK. (We need this ONVIF username and password.)

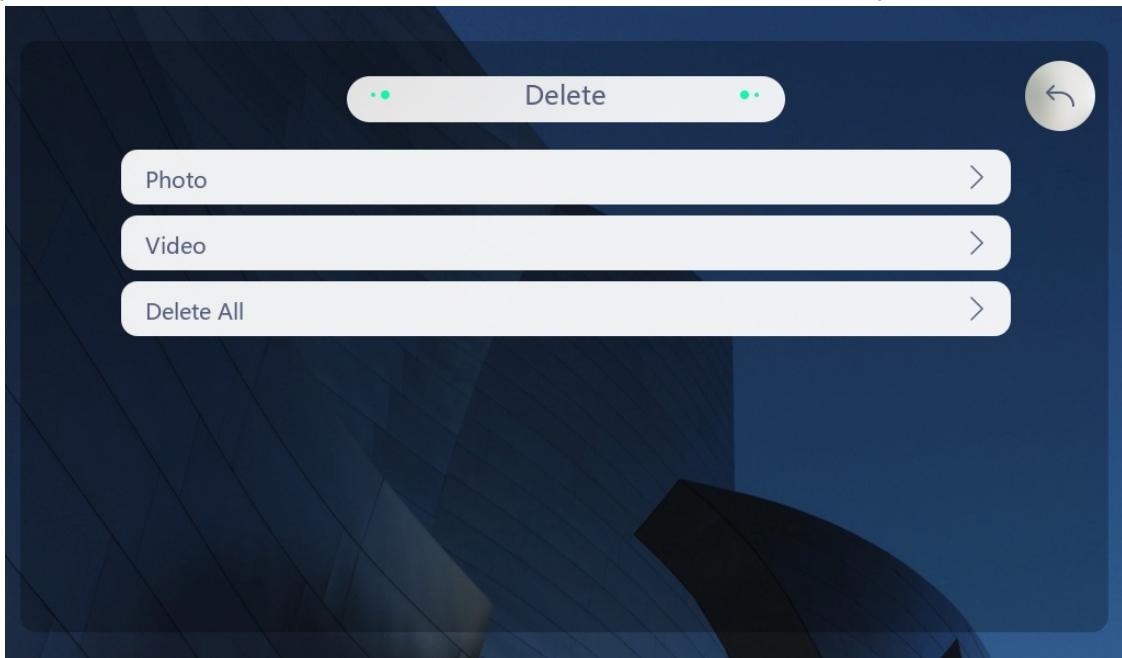

C.In the IPC settings of the indoor monitor, click the IP address of the camera, then input the ONVIF username and password. After that, enable the settings and click "Save."

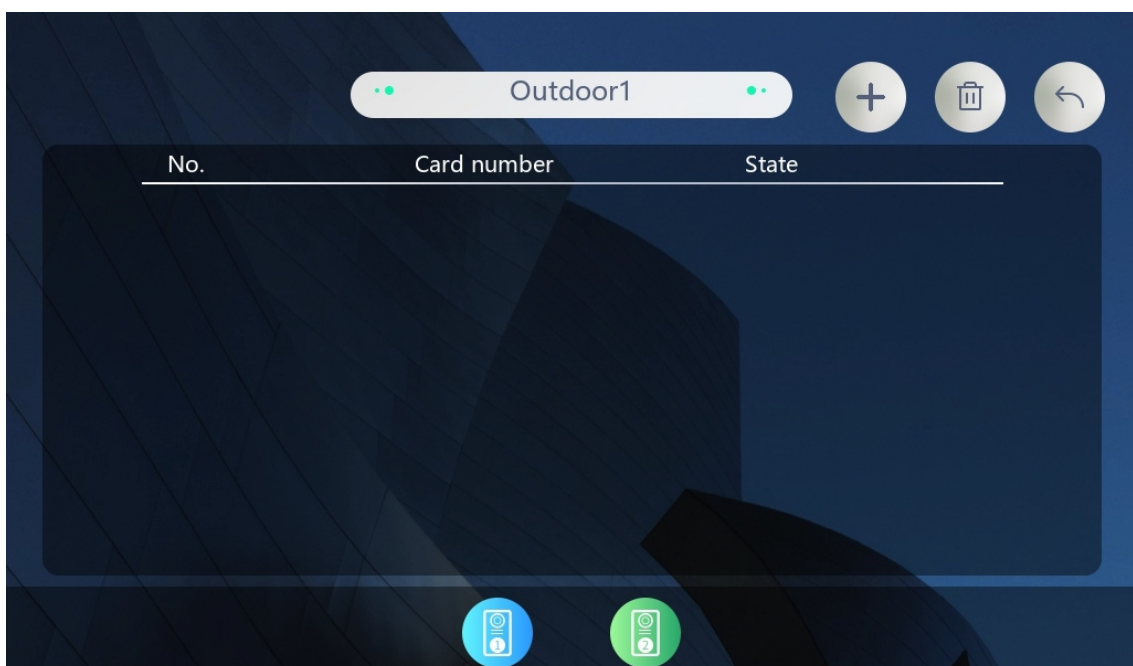

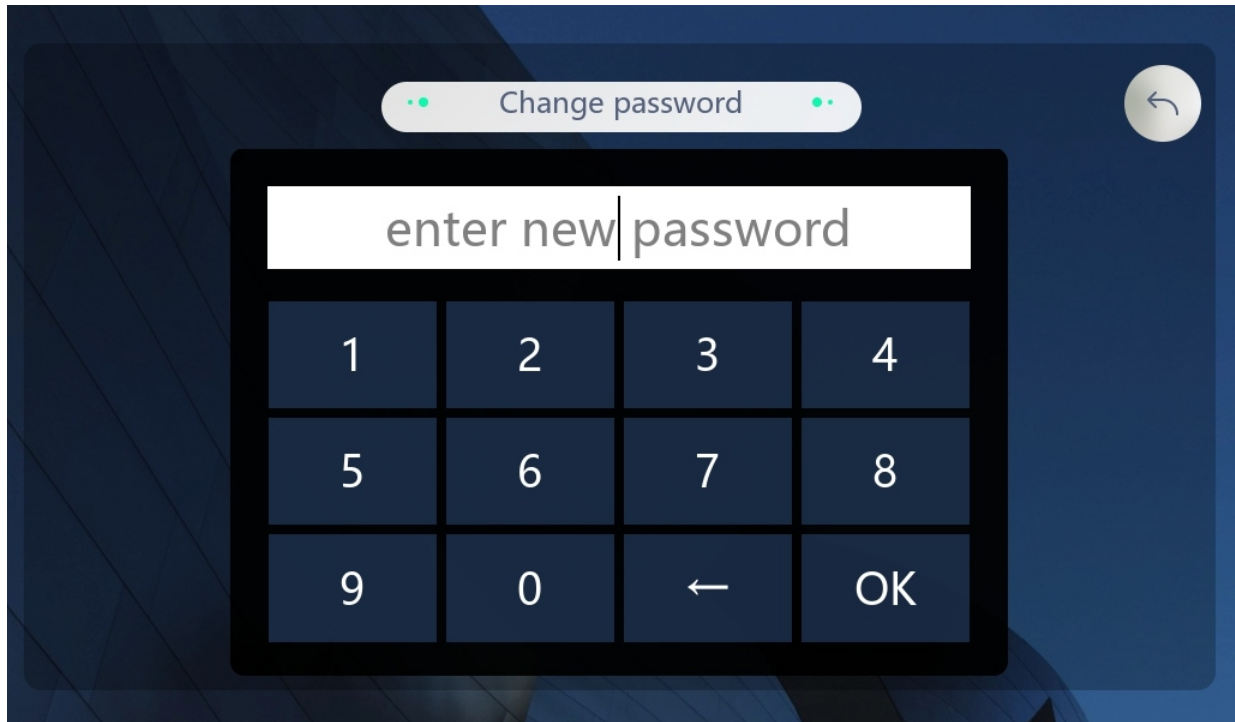

(4) Delete. Remove all photos or videos simultaneously.

(5) Card Management. The call panel must support card swiping.

(6) Change Password (Default password: 666666). Enter the new password twice to update it.

(7) Format. Formatting the TF card will erase all data on the card.

(8) Reset. After confirmation, all settings will be restored to factory defaults. Please be aware!

Specifications

Villa Call Panel (P4)

- Material: Aluminum alloy + glass panel
- Protocol: TCP/IP
- Connection: CAT5/CAT6/2 Wires
- Interface: Rj45
- Power: Non–standard POE switch / powered from the indoor monitor
- Working Temperature: –40°C to +70°C
- Installation: Wall mounted
- Dimensions: 122 x 48 x 20 mm

Villa Call Panel (P901)

- Material: Aluminum alloy + glass panel
- Protocol: TCP/IP
- Connection: CAT5/CAT6/2 Wires
- Interface: Rj45
- Power: Non–standard POE switch / powered from the indoor monitor
- Working Temperature: –40°C to +70°C
- Installation: Wall mounted
- Dimensions: 165 x 90 x 28 mm

Indoor Monitor(M75T)

- Display Screen: 7–inch TFT LCD
- Resolution: 1024 x 600 pixels
- System: Linux operating system
- Network Transmission Mode: TCP/IP protocol
- Connection: CAT5/CAT6/2 Wires
- Color: White + Silver, Black + Grey / Customizable
- Language: Chinese / English / German / French / Dutch
- Material: Plastic + PC
- Power: Non–standard POE switch / Power (12–24V)
- Ethernet Interface: Rj45
- Operating Voltage: DC 12–24V
- Operating Current: $\leq 500\text{mA}$
- Operating Temperature: -30°C to $+60^{\circ}\text{C}$
- Dimensions: 230 x 145 x 26 mm
- Installation: Wall–mounted

Operations

Video Conference Call

To call the monitor, press the button on the call panel. The monitor will display the image from the call panel. Touch the button on the screen to answer, hang up, or unlock the door.

Monitor

To monitor the call panel, touch the monitor button on the screen. Tap the call panel name to switch between call panels.

Touch the photo button to record manually.

Touch the sound button to adjust the volume.

Touch the unlock button to unlock the door.

Touch the mute button to silence the monitor.

Touch the hang-up button to end monitoring.

Photo

When a visitor calls, it will automatically take a photo or video. A MicroSD memory card is required.

In the homepage, there is an option to view the photo or video.

Setting

Ringtone	Set ringtones for indoor monitor
Record	Shows photo or video records of incoming calls or manually taken captures.
Date&Time	Set date and time
Turn Off Screen	Set screen off time
Delete	Remove all photos or videos simultaneously.
Language	English, Chinese, German, French, Dutch, Turkish, Russian, Spanish, Portuguese, and custom.
Information	Check monitor information.
Reset	Restore factory settings

FAQ

NO	Malfunction	Reason	Solution
1	The call panel can't call the indoor monitor.	<ol style="list-style-type: none"> 1. The indoor monitor has been reset. 2. Poor network cable quality or different standards used. 	<ol style="list-style-type: none"> 1. In "Settings" - "Advanced Settings" - "Room Number," set the room number. When used with P4, the room number is 01. When used with P901, the room number is 04. When used with P902, the room number can be 02 or 04. Default password: "666666." 2. Use a T568B standard and high-quality network cable.
2	Before installation, it worked well. After installation, it can't call successfully.	<ol style="list-style-type: none"> 1. Ethernet cable quality. 2. Insufficient power supply voltage. 	<ol style="list-style-type: none"> 1. Use a good quality network cable. 2. Use a power adapter with an output of DC 18V-24V if the network cable is over 40 meters long.
3	When a visitor is calling, only one of the monitors is ringing.	<ol style="list-style-type: none"> 1. Room number is the same. 	<ol style="list-style-type: none"> 1. For example, if the room number of one monitor is "04" - "Master," the other should be "04" - "Slave-1." If there are more screens, the room numbers should be "04" - "Slave-2" and "04" - "Slave-3."
4	Why can't the lock be opened?	<ol style="list-style-type: none"> 1. The power supply controller is not being used. 2. The wires are connected incorrectly. 	<ol style="list-style-type: none"> 1. Use a power supply controller to power and control the lock. 2. Please obtain and check the wiring diagram or video from technical support.
5	Why can't the indoor monitor connect to the Tuya app?	<ol style="list-style-type: none"> 1. Only the indoor unit with the extension number "Master" can connect to the app. 2. The Internet connection may be unstable. 	<ol style="list-style-type: none"> 1. Set the extension number to "Master," then restart the indoor unit's Wi-Fi. 2. Try again when the Internet is stable.
